

WINDOW CLEANING ROBOT MAMIBOT W120-T

Mamibot W120-T window cleaning robot

Key features:

- ✓ Controlled by a button on the remote control
 - ✓ Controlled by remote control
- ✓ Controlled via the iGlassBot application
 - ✓ Fall protection
 - ✓ Power cord range up to 6m
 - ✓ 4 cleaning cloths
- ✓ GearBrain Award at the IFA2918 trade show in Berlin for one of the 10 smartest devices

Cleaning windows has never been so
easy... and quick

Do you find window cleaning a tiresome task? This is the job for our Mamibot W120-T window cleaning robot. It takes about 5 minutes to wash one 2x1m glass pane. The robot will inform you about the end of the washing cycle with a sound signal. Your task will be only... to put it on the glass next! The square shape of the robot allows it to reach every edge of a window, so the robot will cover 99% of the glass surface

Control – what do you prefer?

Depending on the user's preferences, the Mamibot W120-T window cleaning robot can be controlled in 3 ways:

- ✓ Using the main button on the housing
- ✓ Using the included remote control
- ✓ Using the iGlassBot application

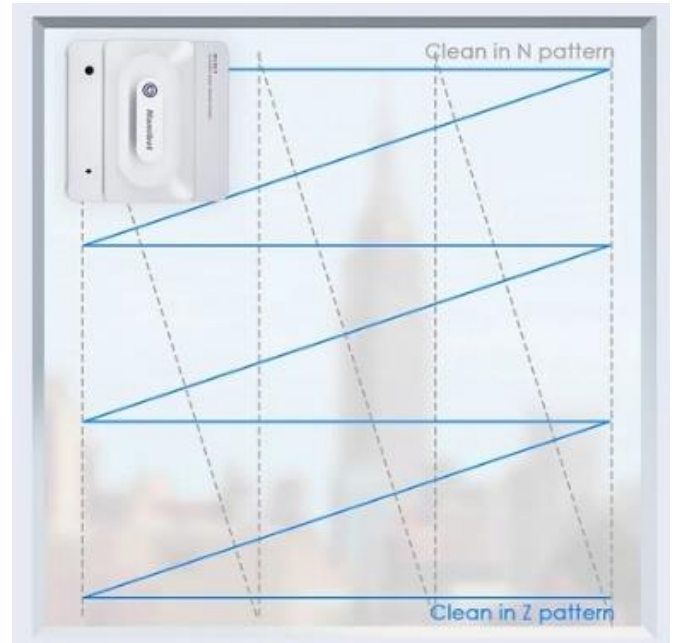

WINDOW CLEANING ROBOT MAMIBOT W120-T

Three modes for thorough cleaning

The degree and type of contamination, or the type of surface to be cleaned, require various methods of the robot's work. There are 3 types of cleaning paths to choose from:

- ✓ N mode – the robot moves from bottom to top along the shape of the letter N
- ✓ Z mode – the robot moves from right to left along the shape of the letter Z
- ✓ Auto Mode – Combines N and Z modes for even more thorough cleaning

Precise, brushless motor

Mamibot W120-T robot is equipped with a brushless, precise motor with a rotation speed of 22,000 rpm, which guarantees high power with the lowest possible noise of <65dB.

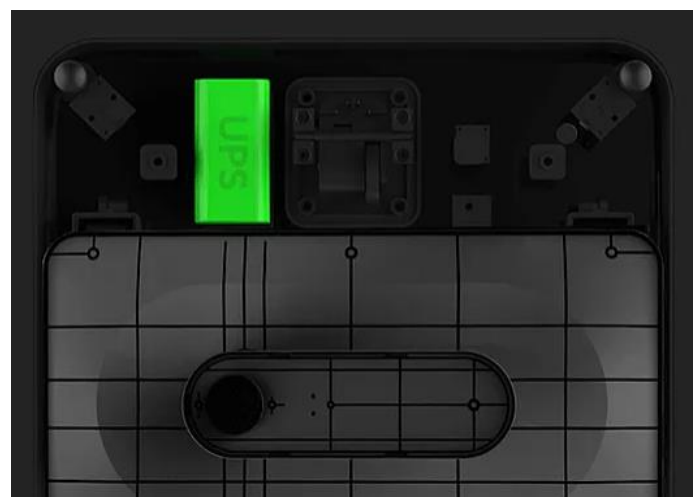

Fall protection

The manufacturer has introduced 3 types of fall protection:

- ✓ 4-meters safety rope
- ✓ Suction to the window with a pressure of up to 3000Pa
- ✓ Built-in 600mAh UPS battery in case of power outage

(enough for 20 minutes of work)

WINDOW CLEANING ROBOT MAMIBOT W120-T

Is the robot only for windows?

The Mamibot W120-T window cleaning robot is suitable for cleaning any smooth surfaces with a border.

In addition to window panes, it will clean mirrors, glass balcony railing panes, large windows, shower cabins and store front windows.

Internal, external
windows

Bathroom surfaces

Marble
walls

Big
windows

Store front
windows

Wet or dry cleaning?

In the case of heavy dirt or dust on the surface, it is recommended to use the yellow cloths and the dry pre-cleaning to remove particles that may scratch the surface. For the proper cleaning, use the grey cloth, previously sprayed with water or glass cleaner.

Yellow for DRY cleaning
of heavily soiled glass

Grey for WET cleaning
of slightly soiled glass

TECHNICAL PARAMETERS

Pressure	3,000Pa
Primary power source	AC
Voltage and frequency:	100-240V, 50-60Hz
Power	75W
Alternative Power Source	battery
Battery capacity	600mAh
Battery voltage	24V
Charging time	1h
Maximum motor speed	22,000rpm
Noise level	65dB

INFORMATION ABOUT SHIPMENT

Product quantity in a master packaging	4
Product quantity on a palette	72
White colour EAN	6970626160249
Black colour EAN	6970626160294
Gross weight	2.95kg
Net weight	1.35 kg
Overall packaging dimensions	275 x 360 x 145mm
Clear dimensions of the product	250 x 100 x 250 mm
Available colours	White or black

Warranty for equipment: 24 months

Warranty for battery: 12 months
