## Electrically height-adjustable desk ET119W-C

In a time when it's common knowledge that ergonomics is especially important when working at a computer, we can customize just about anything. A chair, a monitor, but also a desk.

Comfortable work means fewer health problems - back, spine, neck or wrist pain will become a thing of the past. By being able to adjust the desk, we will also prevent, for example, a situation where the chair cannot be tucked under the tabletop because the armrests do not fit.

Flexibility is the biggest advantage of such desks, but there are also others, such as professional, extremely stylish design, better organized space or convenient electronic control.

**The ET119W-C** features single-motor technology, which not only provides efficient working power, but also makes it smoother with a maximum speed of 25 mm/s and the ability to raise the desk by 500 mm.

# tuckano

The combination of a stable white steel base with a wood-finished top is extremely fashionable, and durable materials will make it last for many years.

Enjoy a modern and convenient solution for your home office or work at an attractive price!

## CAPACIOUS DRAWER

Bearing in mind that the table is to be used for work, the designers also thought about such a useful feature as a capacious drawer for small items. So far, this is less common in height-adjustable desks.

## QUIET OPERATION

The electrically adjustable desk base will only bring you comfort, without unnecessary noise. The adjustment system operates at less than 50 dB, which is the WHO recommended level for daytime environmental noise. This means the system runs quieter than a domestic vacuum cleaner or refrigerator.

## ADVANCED ELECTRONIC CONTROL SYSTEM

The desk is equipped with an intuitive, electronic controller with a display and a memory capable of storing four settings. This allows each user/household member to store their individual preferences.

In addition, there are 2 USB power ports on the panel, with which you can quickly and easily charge your phone or other devices.

## EASY ASSEMBLY

The product requires only a minimum effort from the end user to take full advantage of the product. No special tools are required for assembly and everything comes in one package.

## ANTI-COLLISION SYSTEM

The desk is equipped with an anti-collision system based on gyroscopic technology so that when it encounters an obstacle, the motor starts running back in the opposite direction to avoid damage.

### TECHNICAL PARAMETERS

<b>Product colour</b>	black
<b>Adjustable height</b>	Yes
<b>Height adjustment</b>	720 - 1,220 mm
<b>Maximum weight</b>	50 kg
<b>Table top material</b>	Wood
<b>Frame material</b>	Steel
<b>Wheels</b>	No
<b>Operating voltage</b>	100 - 240 V
<b>Additional information</b>	Self-assembly furniture 4 height settings can be programmed in the memory Anti-collision system

### WEIGHT AND DIMENSIONS

<b>Product width</b>	1,204mm
<b>Product depth</b>	604mm
<b>Product height</b>	720mm
<b>Table top thickness</b>	1.2cm
